- Remove the cap of the device, place the side with card slot face upwards and pull out the slot in the direction shown in the figure1
- Insert the (U)SIM card into the modem through the slot with the contact tip face down shown in the figure 2

figure2

#### **To Insert Micro SD Card**

- Unfold the protecting cover of the Card Holder
- Insert the Micro SD card into the socket according to the indicated direction and confirm the Micro SD card is inserted completely.

### **Connect the 3G USB MODEM to the PC**

You can connect 3G USB MODEM to the PC just like using USB storage device.

### **2.2 Installation Guide**

- The system tray icon appears when the modem is connected. With some operating systems, a dialog box will prompt you to select the next step. Choose <launch the program> by default and click on <OK>;
- Select the language for the application, and then click on <OK>. The welcome message will pop up. Click on <Next>;
- Click on <Browse> to select a folder to install the application;
- Then choose if you want to add a shortcut and go to the next step;
- Click on <Install> if Ready to install ,the application and driver will be installed automatically;
- Click <finish> to complete the installation, the PC programme group displayed in the <Start> menu.

**Note:** Please do not unplug the device while the driver is being installed.

## **3 Connecting to the Internet**

### **3.1 Preparing to connect**

- Make sure the (U)SIM card is correctly inserted;
- If the installation is completed, the application runs automatically and the main window will pop up when the device is connected. You may also run the application from the <start> menu;
- If the PIN code has been enabled, you should enter the right PIN code in the relevant field, and click on <OK>.

### **3.2 Connecting using the default connection profile**

- a. In this case, the application will connect to the internet using the default connection profile on your (U)SIM card without setting any user-defined or predefined profile;
- b. Connect to the network clicking on the  button;
- c. Wait for some seconds until the connection is completed;
- d. When you are connected to the internet, the connection information window will appear in the system tray.

If connection fails, please check APN setting.

### 3.3 Disconnecting from the Internet

If you want to disconnect from the internet click  icon to disconnect from the internet.
